Abstract (en)

[origin: EP1900649A1] An airtight container (1) with a vacuum valve (4) in a double structure is disclosed, which is able to enhance an engaging force of a lid (3) by sealing an interior of the container (1) in a vacuum state, and is able to store a food for a long time period without rotting by making the interior of the container (1) vacuum by discharging air from the interior of the container (1) to the outside with the assistance of a vacuum pump (23), and a connection part (24) of the vacuum pump (23) is made in a compact size to obtain an easier storing and preventing damage.
