Abstract (en)

[origin: DE202006014183U1] The lifting platform for heavy loads, especially motor vehicles, has at least two load supports (1,2) with support surfaces (6) each with an assembly of pivoting scissor levers (3). The lever legs support the load surfaces at one end and on the ground support (4) at the other end. A hydraulic cylinder (7a) gives the vertical up and down movements through the operation of a hydraulic pump (8).
