Abstract (en)

[origin: EP1901398A1] The strap has a conductor clamped between two clamping legs for producing an electric contact, and a sheet metal pressing part (1) with sections (4, 5), which form one of the clamping legs. The sections are limited by a narrow edge recess (3) on the pressing part, an external edge of the pressing part and lines (9, 10), which runs from an inner end of the edge recess to the external edge of the pressing part. The legs are moved towards each other or opposite to each other perpendicular to a longitudinal direction of the legs.
