Abstract (en)
[origin: WO2007003556A1] The invention relates to a motor vehicle system for operating in the motor vehicle compartment (1) comprising at least one audio device for producing and/or receiving acoustic signals by means of several loudspeakers distributed in the compartment (1) or at least one microphone (12) and at least one image acquisition-recording device (10) placed in the compartment (1). According to said invention, said image acquisition-recording device (10) detects the seat occupancy in the compartment (1) and a control makes it possible to adapt said occupancy according to the image acquisition and to adjust the audio device for controlling the loudspeakers (11) or the microphone (12).
