Abstract (en)

[origin: WO2007008161A1] The invention concerns a tube (1) of polymer, weldable material with an extension in an axial direction (6) and an extension (7) in a radial direction, perpendicular to the axial extension (6), and comprising a tube body (2), displaying a first end (8) with an emptying opening (4) and a second end (9) with a seal in the form of an end weld (10). The end weld (10) extends in a plane with an angle β to the axial extension (6) which is 83 - 90°, preferably 85 - 90° and most preferably 87 - 90°, and consists of a first part (10a) and a second part (10b), arranged at an angle α to one another, the angle α between the parts (10a, 10b) being 70° - 110°.
