Abstract (en)
[origin: WO2006136643A1] The invention relates to a method designed to be applied in connection with the assembly and/or modernization of an elevator car, in which method a car frame (1) is assembled comprising a floor (2), a ceiling (3) and vertical columns (4) connecting the floor and the ceiling to each other, and wall elements and/or cladding elements (5) are mounted on the car frame (1). The invention additionally relates to a method to be applied in connection with the disassembly of an elevator car. The invention also concerns an elevator car, which comprises a car frame (1) comprising a floor (2), a ceiling (3) and vertical columns (4) connecting the floor and the ceiling to each other, and at least one wall element and/or cladding element (5) is attached to the car frame (1).
