Abstract (en)
[origin: DE202005010912U1] The case has an opening (4) for supplying and discharging air, where the opening is sealable by a movable closure (6) from a closing position to an open position. The closure is provided with a thermal insulation, which is positionable in a section of air pipes (3) in the closing position of the closure and outside the air pipes in opening position of the closure. The thermal insulation consists of an insulating body.
