Abstract (en)
[origin: WO2007006499A2] The invention relates to a modular housing wall (1) for telecommunications and data technology devices, and to a method for the production thereof, comprising at least one covering element (2) for forming a flat wall section and at least one detent rail (10) for fixing the at least one covering element (2). The at least one covering element (2) has, at least in part, a U-shaped cross-section with a number of detent means (5), and the detent rail (10) has fastening means comprising notches (13a), and the detent means (5) for hanging the covering element (2) on the detent rail (10) are brought into contact with said fastening means.
