Abstract (en)

[origin: EP1902636A2] The device has a housing with an insert opening for strand shaped tobacco articles, and a knife (13) relocatably supported in the housing. An edge of the knife is moved through the insert opening to cut an introduced tobacco strand. The blade has a tip (15) that is aligned centrally to the insert opening. Two returning cuts (17) are placed from the tip to the knife and form a nose angle from 30 to 120 degrees.
