Abstract (en)

[origin: EP1902854A2] The device has a lining table (11) comprising a suction plate (12) that has suction openings admitted with vacuum. A vacuum generator is used for supplying vacuum to one of the suction openings, where compressed air supply of the vacuum generator is interruptible, and pressure and/or air flow of compressed air supplied to the vacuum generator is changed. Strength of the vacuum and/or suction air flow is varied. An independent claim is also included for a method for print processing for connecting a lining strip to a sheet stack such as book block.
