Abstract (en)

[origin: EP1903161A1] The device has inspection frames (3), and an inspection cover (4) inserted at an inner side of the frames. The frames have a large rotating frame section for retaining of a sheeting (7) for a wall-/ceiling-/floor-lining (2) at an outer side of the frames. Fastening devices and/or flat rods (8) are provided for fixing of the sheeting, attached to the outer side of the frames in a depth-adjustable manner and surround the frames. The frames and/or the fastening devices and/or flat rods are implemented as rolled- and/or extruded sections made of aluminum, steel and plastic.
