Abstract (en)

[origin: WO2006136227A1] The quick-release device for attaching a vertical load bearing wire (32) to a supporting wire (30), which extends in a plane that is essentially perpendicular to the load bearing wire (32), is used for growing climbing plants along said load bearing wire (32). The device comprises a bracket (1) having clip-on fastening means for being suspended from the supporting wire (30), and holding means for assuring the suspension of the load bearing wire (32). The holding means have a female element provided in the carrier (1) and is capable of interacting with a male element fixed to the load bearing wire (32).
