Abstract (en)
[origin: WO2006124611A1] Inhibitors of angiogenesis are disclosed as being useful therapeutics for treating various aspects of inflammatory bowel disease, in particular Crohn's Disease. A method for decreasing the magnitude of intestinal inflammation or inflammatory infiltrate in bowel tissue, a method for lowering systemic or gut-associated levels of a proinflammatory cytokine in a subject, a method for reducing microvessel density in fixed bowel tissue sections and a method for treating an inflammatory bowel disease are disclosed. Preferred agents to achieve the foregoing are pentapeptides that include Pro-His-Ser-Cys-Asn (SEQ ID NO:1) and variants or derivatives thereof.
