Abstract (en)

[origin: WO2007006363A1] The invention relates to a compression bar system for a braced front construction, said compression bar system comprising a compression bar (2) and connecting elements for tension elements (5) and the like disposed on the compression bar (2). The aim of the invention is to provide a compression bar system which can be produced with little complication and cost. For this purpose, every connecting element (3) is configured as a prefabricated component part which can be connected to the compression bar (2).
