Abstract (en)

[origin: WO2007003631A1] The invention relates to a door handle for motor vehicles, comprising a plastic housing and an antenna coil (3), arranged in the housing, for communicating with an ID transmitter. The door handle is provided with a chromium coating (1). Said coating (1) has at least one discontinuity (4) which prevents the formation of a closed electrically conducting path that extends around the antenna coil (3) at an angle to the coil axis.
