Abstract (en)

[origin: WO2007006394A1] The invention relates to a clutch release bearing (21) that is in contact with a disk spring. Said clutch release bearing (21) comprises at least one curved stop face (12, 28, 30, 33) that is located at a radial distance from the axis of rotation (4) of the clutch release bearing (21) and is used for stopping at least one end (39) of at least one spring tongue (40) of the disk spring.
