Abstract (en)  
[origin: WO2007010112A2] The invention concerns a cellular telecommunication network relay antenna (1) comprising: at least one transmitting and/or receiving radiating element (2); a radome (3) transparent to electromagnetic waves covering the transmitting and/or receiving radiating element (2) to protect same. The transmitting and/or receiving radiating element (2) is supported by the radome (3), said radome (3) having anchoring means enabling the antenna (1) to be fixed to the ground.
