Abstract (en)

[origin: WO2007009511A1] The invention relates to a contact spring (1) which has lamellae (8, 9) in the direction of a respective contact area (2, 3), it being possible to bring the lamellae (8, 9) into contact with the contact areas (2, 3) by means of contact points (6, 7), wherein the invention provides that at least one of the contact points (6, 7) has a coating, with the respective material of the coating being matched to the material of the contact area (2, 3).
