Abstract (en)
The invention relates to a side stabilizer, which is intended for the three-point coupling of a tractor. The side stabilizer includes two body pieces (10, 11) arranged to form a telescopic structure, at both ends of which mounts (12, 13) are arranged for attaching the side stabilizer. In addition, a catch (14) is supported moveably on one of the body pieces (10, 11), for preventing the mutual longitudinal movement of the body pieces (10, 11), when the catch (14) is in the locking position. For which purpose there is a locking structure (15) in the catch (14), a locking detent (16) corresponding to which being arranged in the body piece (10, 11) without a catch. In the body piece (10, 11) too, that is equipped with the catch (14), there is a second locking detent (17), which corresponds to the locking structure (15) of the catch (14) .
