Abstract (en)  
[origin: EP1905329A2] The window hanging has a hanging unit (2) with an arresting unit (3) and an etch primer (1), where the etch primer is mounted/mountable on and/or in an environment of a window. The etch primer and the arresting unit interact with each other in a magnetically attractive manner such that the hanging unit is mountable in the etch primer in a position variable and removable manner. The primer is designed as a magnetizable/magnetic metal band or magnetizable/magnetic metal strips. The primer is mountable on or in an area of the window parallel to a window edge of a window frame.
