Abstract (en)
[origin: EP1905908A2] The discharge device has a long extended gutter (1) into which waste water is entered. A discharge unit is partially inserted into a ground section consisting of a pavement (14), and is connected with a discharge pipe. The gutter is provided into the discharge unit, where the device has a support leg (6) with a flexible section. The support leg is on a concrete pavement (13) arranged under the pavement.
