Abstract (en)
[origin: EP1905932A2] The sliding door has a drive motor and a deviating device (7) and a flexible drive unit, which are together fixed at a motor vehicle (2) using a fastening unit (12) as a compact installation module, where the fastening unit is arranged through a body opening (11). The fastening unit fixes the drive motor and the deviating device and the flexible drive unit in the body opening, and seals the body opening at the same time. The fastening unit has a hollow borehole (16), through which the flexible drive unit is guided.
