Abstract (en)

[origin: EP1906098A2] The oven door has a plate (7) and arranged before a closely adjacent front disc (1). An open upward flow channel (10) and a limited heat part is provided in the disk level well made from conductive material such as aluminum. A distance is provided between the plate (7) and a closely adjacent disc and immediately adjacent a surface with laminar air flow provided. An independent claim is included for a household oven.
