Abstract (en)
[origin: EP1906124A2] The device has a storage surface (1) including upper and lower longitudinal and transverse edges (2, 4), where side walls (3) of the edges (2) point downwards. Bearing surfaces (5) of the edges (4) point under the storage surface, where the bearing surfaces are aligned parallel to the storage surfaces. Two adjacent side walls and two adjacent bearing surfaces form an edge area (6). The bearing surfaces are joined to each other at an obtuse angle in the edge area, where the bearing surfaces are connected with a soldering weld that is formed in an area of a recess (7).
