Abstract (en)

[origin: WO2006129149A2] The present invention relates to novel poultry and livestock supplements that effectively replace the use of antibiotics in poultry and livestock feeds, that comprise probiotics and methylsulfonylmethane. The supplements further comprise saccharides, vitamins, carotenoids, xanthophylls, minerals and electrolytes. The components of the supplements described in the present invention function synergistically as nutrients sources, that enhance the growth and productivity of poultry and livestock, as well as anti-microbial factors that effectively inhibit, if not completely eliminate, pathogenic microorganisms.
