Abstract (en)

[origin: WO2007009943A1] The invention provides a process for producing a gas stream depleted of H₂S and of RSH from a feed gas stream comprising H₂S and RSH, the process comprising the steps of : (a) contacting the feed gas stream with absorbing liquid in a H₂S removal zone to obtain a gas stream depleted of H₂S; (b) contacting the gas stream obtained in step (a) with aqueous scrubbing solution comprising CuSO₄ in a RSH removal zone to obtain a mixture comprising Cu-alkylsulphide products and the gas stream depleted of H₂S and depleted of RSH.
