Abstract (en)
[origin: WO2007009614A1] A wheeled levelling device (1) arranged to level and move refrigerators or freezers (2). The wheeled levelling device is adjustable from the front of the refrigerator/freezer through turning an adjusting rod (4). The wheeled levelling device is inserted in a rectangular hole of the bottom plate (5) of the refrigerator/freezer, preferably one in each corner, and interacts with two opposite sides of the rectangular hole. A wheel assembly (10) of the wheeled levelling device pivots around one of the sides of the rectangular hole during its operation as a convex ridge (40,41) of the wheel assembly interacts with a transversal wall (18) facing the wheel assembly.
