Abstract (en)
[origin: CA2616050A1] The invention relates to a front-end vehicle structure (2) for a commercial vehicle, comprising a forward crash zone (6) and a rear crash zone (8) relative to the longitudinal direction (4) of the vehicle. The forward crash zone (6) and the rear crash zone (8) are interconnected via an intermediate structure (10) which is mounted therebetween and extends substantially perpendicular to the longitudinal direction (4) of the vehicle such that a force that is applied to the forward crash zone (6) can be transmitted to the rear crash zone (8) via the intermediate structure (10).
