Abstract (en)
[origin: WO2007008082A1] The invention relates to a closure device (1) with or without a drinking mechanism (30) for bottles/receptacles, arranged to be attached to the bottle/receptacle, and where the device comprises a first cavity (2) preferably for additive. The invention is characterised in that at least one second cavity is provided in the device, where the first and the at least second cavity can be opened individually by means of opening mechanisms which are integrated in the device and can be influenced from the outside of the device.
