Abstract (en)  
[origin: WO2007009902A1] The invention relates to a damping device (1) for mobile furniture parts, comprising a linear damper having a cylinder (8) and a piston, displaceable in the cylinder (8), and a piston rod (9) connected to the piston. The piston rod (9) is biased in a position pointing away from the cylinder. The linear damper is connected to a tappet (7) which interacts with a stop (6) mounted on the mobile furniture part (5). The invention allows to configure the damping device (1) irrespective of the design of the furniture part.
