Abstract (en)

[origin: WO2007012565A1] The invention relates to a method for operating a road communication system, said method having the following steps of: providing an emergency run signal, which indicates that an emergency run is taking place, in an emergency vehicle; providing an information signal for at least those vehicles whose paths may disrupt the path of the emergency vehicle on the basis of the emergency run signal; and outputting an indication to users of the vehicles on the basis of the information signal.
