Abstract (en)  
The invention relates to a structural toilet support system which is used in bathrooms in order to provide assistance, comfort, support and stability to users sitting down on, on or standing up from a toilet. The invention was developed in response to the need for suitable support to be provided for anyone using a toilet, particularly the elderly. The inventive system is suitable for use with toilets and seats already available on the market. The invention is available in various different colours such that it can be blended with the environment for which it is intended, e.g. silver plating, chromium plating, gold plating, brushed steel or lacquer of different colours. In addition, the invention can be easily removed and transported.
