Abstract (en)

The device has a flexible fireproof plane material (2), which is so dimensioned that the flexible plane material partly covers and fixes a building (1) from outside in the case of operation. The flexible plane material is placed in an unused condition, which is rolled up or folded together on a support (3), and the support is arranged on the building top. The material is unfolded or rolled up downwards outside the building in the case of operation.

Abstract (de)

Die Erfindung eine Vorrichtung zum Schutz vor von außen verursachten Bränden für Baulichkeiten unter Verwendung von mindestens einem flexiblen feuerfesten flächigen Material, wobei das flexible feuerfeste flächige Material (2) so dimensioniert ist, dass es im Einsatzfall die Baulichkeit (1) von außen mindestens abschnittsweise bedeckt und fixierbar ist.
