Abstract (en)
The invention relates to a method of inserting a plurality of inserts from a distinguishable set into a multi-sheet document, comprising the steps of inserting inserts into the document in accordance with a job definition, such that a stack of inserts and processed sheets is obtained, said stack having at least one aligned side determining the number of surplus inserts wherein the surplus of inserts is inserted at the end of the document offset the aligned side of said stack. The invention also relates to a sheet processing apparatus, comprising a controller arrangement configured for executing the method according to the invention.
