Abstract (en)
[origin: EP1908893A1] The invention relates to an awning housing assembly comprising a support and incline-adjustment device. Each end of the housing (40) comprises: a support piece (1) fixed to a wall or structure and provided with a flat portion (66); an end plate (2) fixed at one end of the housing (40), pivot connected to the flat portion (66) of the support piece (1), and provided with a recessed zone (8); means for adjusting the angular position of the housing (40), including a toothed wheel sector (3) formed along a peripheral edge (47) of the flat portion (66) of the support piece (1) and a rack (4) formed on a sliding piece (12) that is housed together with an actuation screw (5) in a cavity (7) in the end plate (2); and means for locking the end plate (2) in relation to the support piece (1) in a selected position.
