Abstract (en)

[origin: EP1908910A2] The window or door has a drying agent and a vapor barrier and has a profile (1) to support glass panes (2, 3, 4). Below gaps (Z1, Z2) of the glass panes, a channel (6) is provided having a curvature (9) which is covered and having perforated openings (10). The channel has a drying agent (T) and below the channel floor (8) two additional channels (7a, 7b) are provided for moisture. The channel and floor provide a stable network for a slanted additional channel.
