Abstract (en)
The frame (1) has front and rear parts (AV, AR) including holes, where one of the parts is partially transparent. The holes of the front part are associated to the holes of the rear part, where the associated holes are aligned when the front and rear parts are superimposed. Fixation elements i.e. grubscrews (9), penetrate the associated holes for integrating the front and rear parts. The fixation elements have length which is equal to thicknesses of the front and rear parts and are screwed to provide threads held at ends of the front and rear parts of the thicknesses. An independent claim is also included for an assembly station comprising a controlling unit.

Abstract (fr)
Un cadre d'affichage 1 comporte : - une partie avant AV et une partie arrière AR, au moins partiellement transparente, - une pluralité de perçages des parties avant et arrière, - une pluralité d'éléments de fixation. Les éléments de fixation sont : - des vis sans tête, - de longueur au moins sensiblement égale à l'empilage des épaisseurs des parties avant AV et arrière AR, - et vissées de façon à présenter des filets en prise sensiblement aux deux extrémités de cet empilage d'épaisseurs.
