Abstract (en)  
[origin: WO2007013849A1] The invention relates to a device (1) at a motor vehicle (2), comprising an engine compartment (3) having an engine (4) received therein that is driven by flammable fuel, such as, e.g., petrol, gas or diesel, and that said engine compartment (3) is surrounded by a protecting casing (5). Easily accessible from the outside (7) of the vehicle, an opening (6) is arranged that leads into said engine compartment of the vehicle and that is adapted to receive the nozzle (8) of a fire-extinguisher (9) externally of said vehicle (2). Said opening (6) is arranged to be closed by a temporary seal (10) that is arranged to be possible to bridge-through or open upon desired temporary passage through the opening (6) into said engine compartment (3) with extinguishants (11). Said opening (6) is situated substantially right opposite the fire-hazardous parts (12-14) of the engine, such as, e.g., turbo (12), exhaust pipe (13), fuel pipe (14), etc.
