Abstract (en)
[origin: US2009077707A1] The invention relates to a shin guard, in particular for footballers, having a stiff shield element (3) arranged in front of the shin, and having means of fastening the shield element (3) on the lower leg (1). According to the invention, the fastening means have a strapping device (2) running around the lower leg (1), and the shield element (3) is connected to the strapping device (2) over much of its inner surface (18), which is directed towards the shin.
