Abstract (en)
[origin: WO2007009467A2] The present invention relates to bricks with holes and an apparatus and a method for the manufacture of bricks with holes, especially manufacture of soft mud bricks with holes. An apparatus for the manufacture of green bricks is disclosed, comprising a mould with a plurality of mould cavities defined by sidewalls in the mould and having open bottoms and open tops, a filling device for filling brick raw material into the mould cavities, a device for removing green bricks from the mould cavities, and a material removal device for making holes in a green brick, comprising a first support plate to be positioned adjacent the green brick for support of the green brick during material removal, and wherein the material removal device is adapted to make a plurality of holes in the green brick by removing a part of the green brick through at least one opening in the first support plate.
