Abstract (en)
[origin: WO2007009417A1] The invention relates to a cabriolet (1) which comprises a roof end (3) which can be secured to at least one an hook part (6) which is arranged on an upper transversal frame part (4) of the windscreen frame when the roof (2) is in the closed position. Said cabriolet is embodied in such a manner that the at least one hook part (6) can be moved in a translatory manner in the upper transversal frame part (4) in order to secure the roof (2).
