Abstract (en)

[origin: CA2617295A1] The invention concerns an ampule forming a receptacle for a liquid substance , made of a brittle rigid thermofusible material, comprising a body (3) having , at one of its ends, a filling tip (1) by suction of the liquid substance. Th e invention is characterized in that the end opposite said tip (1) forms an opening (2) for emptying the receptacle, sealed and removable closing means (4) being mounted on the opening.
