## Abstract (en)

[origin: WO2007006901A1] The invention relates to a lubricant, anti-corrosive and anti-static composition for hydrocarbon mixtures, comprising : a) at least one compound of formula (I), where R1 and R2 = H or a 1-40 C linear or branched alkyl group, optionally containing one to five double bonds, where R1 and R2 may together form a 5-6 C aromatic or aliphatic ring, said ring may have one to three 1-40 C linear or branched alkyl substituent groups, where R1 and R2 may not together = H, where R3 and R4, independently = OH-carrying groups, where R3 and R4 may not together = OH or derivative of a 1-20C linear or branched mono- or poly-ol with a functionality of 2 to 5 inclusive and b) at least one compound B corresponding to a saturated or unsaturated 16-24C fatty acid optionally mixed with a carboxylic acid with at least one aromatic and/or olefinic ring or polycyclic ring and/or the corresponding ester, amide or amine salt derivatives thereof alone or in a mixture.
