Abstract (en)
[origin: DE102005037174B3] The painting device includes a painting belt and the conveying device taking the car bodies (1a, 1b, 1c) through the painting process. There are electrodes in the belt, connected at one poll to a voltage supply (20). The other poll is connected to a contact rail (2) extending unbroken through the paint bath along the path of the workpieces. There is one contact device (3a, 3b, 3c) and one voltage control device (4a, 4b, 4c) for each car body.
