Abstract (en)

[origin: WO2007012741A1] The invention concerns a plant for treating loamy debris of a work site. The invention is characterized in that said plant comprises: a vibrating hopper (2), called intake hopper; a conveyor (3), called weighing conveyor, integrating means continuously weighing (4) the transported feed; at least one reservoir for storing (5) a binder; means for metering (6) the binder based on the weighing performed at the weighing conveyor (3); means for compounding (7) a loam/binder compound to obtain in the output of the plant (1) a material adapted to be used as backfill material capable of being compacted.
