Abstract (en)

[origin: WO2007017106A1] The invention relates to a coolant conduit for a motor vehicle air-conditioning system comprising a corrugated metal hose (1) provided with radially external crests (2) and radially internal troughs (3). Said metal hose is optimised with respect to a pulsation resistance and the mobility thereof by the fact that it has, at least in the several of the crests (2) thereof, the thickness (S_{a}) greater than the thickness in the certain troughs (3) thereof.
