Abstract (en)

[origin: WO2007012156A1] An air conditioning evaporator unit having a main body with front and rear sides, a top and bottom, all forming a housing with partially open ends, includes a pair of end covers which are attached to the body by snap-in brackets located near the rear of the unit. Female brackets attached to the body include opposed fingers that define a slot that leads to a pocket, and the cover brackets each include a post that can be snapped in through the slot and into the pocket of the body bracket. A single fastener located at the front of the unit interconnects the body to the cover.
