Abstract (en)
[origin: WO2007009973A1] The invention relates to capacitive rain sensors. The inventive rain sensors are placed on a window panel, comprise electrodes and conductors, which supply the latter and which are made of a conductive material. Inside the sensors, the electrodes are provided with dimensions and are arranged relative to another so that they simultaneously have a number of levels of sensitivity. The inventive rain sensors are primarily used on motor vehicle windshields.
