Abstract (en)

[origin: WO2007018494A1] Methods and system for counterbalancing accelerations and/or torques caused by actuation of an actuation element (Fig. 2, 40) and a scanning element (Fig. 2, 34). A scanning beam device (Fig. 1, 14) may comprise a counterbalance to generate forces and/or torques substantially equal and substantially opposite to the forces and/or torque generated by the scanning of the actuation element.
