Abstract (en)

[origin: WO2007002212A2] A System and method are provided for managing financial market Information. According to certain embodiments, the System includes a Computer having a memory, processor, and display. The processor is capable of generating a graphical depiction of the financial market information on the display. The graphical depiction includes a multidimensional representation of a broad range of market information for at least two financial instruments. The graphical depiction resides in a Single window on the display. The financial instruments may include multiple different classes of financial instruments, such as treasuries and futures. Different instruments may be selected and information, including basis information, relevant to the selected instruments may be displayed in a second window.
